## LEARNING OBJECTIVES

- To learn about best clinical practice in the multidisciplinary management of early and late stage ovarian cancer
- To understand the importance of biology and pathology of common and rare ovarian tumours
- To understand the options for treatment of recurrent disease and how treatment-decisions are made
- To understand the novel therapeutic agents being developed to treat ovarian cancer and how knowledge of genomics and molecular pathways guides drug development
- To learn about the management of patients with symptoms of the disease and the side-effects of treatment

## ACCREDITATION

The programme of this event has been accredited with **10 ESMO-MORA category 1 points**.

Recertification is necessary for medical oncologists to remain professionally certified by ESMO. Recertification guarantees that a certified medical oncologist has continued to update her/his knowledge and continues to possess the necessary skills and standards for the practice of medical oncology.
