

Contents

Preface	vii
Contributors	viii
Abbreviations	x
Disclosures	xi
A. What every oncologist should know	
1. Epidemiology, pathogenesis, and risk factors <i>E Capelletto & S Novello</i>	1
2. Prevention and screening of lung cancer <i>G Veronesi</i>	7
3. Diagnosing lung cancer <i>C Dooms</i>	14
4. Histopathological and molecular characterisation of lung cancer <i>A Warth</i>	20
5. Principles of surgery of non-small cell lung cancer <i>MA Hoda & W Klepetko</i>	26
6. Principles of radiotherapy of thoracic tumours <i>S Senan</i>	32
7. Adjuvant and neoadjuvant therapy <i>B Besse</i>	38
8. Treatment of metastatic non-small cell lung cancer <i>N Reinmuth & M Reck</i>	44
9. Treatment of small cell lung cancer: chemotherapy and radiotherapy <i>D De Ruysscher</i>	51
B. More advanced knowledge	
10. Malignant pleural mesothelioma <i>GL Ceresoli, G Pasello, & F Calabrese</i>	61
11. Thymic malignancies <i>N Girard</i>	65
12. Neuroendocrine tumours of lung origin <i>MC Garassino, A Billè, & S Pusceddu</i>	69
13. Emerging targets and new agents in lung cancer <i>TA Yap & SB Papat</i>	73
Appendices	
1. WHO Classification	77
2. International Association for the Study of Lung Cancer/American Thoracic Society/European Respiratory Society Classification of Lung Adenocarcinoma in Resection Specimens	79
3. Selected treatment schedules	80
