<b>1 Introduction</b>	<b>1</b>
Reference	2
<b>2 Basic Concepts of Nutrition</b>	<b>3</b>
Energy and Protein Balance	3
Body Composition Measurement	4
Diagnosis of Malnutrition and Overnutrition (Screening and Assessment)	6
Influence of Malnutrition and Overnutrition on Physiological Functioning	8
Nutritional Requirements of the Adult	10
Appetite and Its Control	12
Metabolism of Energy, Carbohydrates, Lipids, Proteins and Amino Acids, and Water and Electrolytes	13
Physiological Function and Deficiency States of Trace Elements and Vitamins	16
Further Reading	18
<b>3 Role of Nutrition in Cancer Prevention</b>	<b>19</b>
Body Fatness	21
Physical Activity	21
Plant Foods	22
Red Meat and Processed Meat	22
Alcohol	23
Preservation, Processing, and Preparation of Foods	24

	Dietary Supplements	24
	Recommendations for Specific Groups	25
	Other Food Groups Associated with Cancer	25
	Concluding Remarks	26
	References	26
<b>4</b>	<b>Cancer and the Nutritional Status</b>	28
	Evaluation of the Nutritional Status of a Cancer Patient	28
	Cancer Anorexia and Cachexia: Causes and Treatment Options	29
	Interactions of Nutrition and Cancer	30
	Malnutrition and Cancer Outcome	30
	Obesity and Cancer Outcome	30
	References	31
<b>5</b>	<b>Cancer Treatment and Nutrition</b>	33
	Impact of Food on Anticancer Drugs (e.g. Interactions between Anticancer Drugs and Nutritional or Herbal Supplements)	33
	Nutritional Support During Cancer Treatment	35
	Monitoring of Nutritional Status and Nutritional Support During Cancer Treatment	38
	Use/Indications of Parenteral Nutrition and Enteral Nutrition During Cancer Treatment	40
	Closing Remarks	47
	Further Reading	47
<b>6</b>	<b>Nutritional Support for the Advanced Cancer Patient During Best Supportive Care</b>	49
	Clinical Situations for Nutritional Support	50
	Reasons to Consider Initiating, Withholding, and/or Withdrawing Artificial Nutrition and Hydration in Patients Who are Imminently Dying	52
	General Principles of Nutritional Support	52
	Arguments for Initiating or Discontinuing Artificial Hydration	53
	The Role of Ketones	54
	Conclusion on Nutritional Support	54
	Ethics	54
	Further Reading	56

<b>7</b>	<b>Counseling and Intervention</b>	57
	Individualized Dietary Counseling	57
	Goals of Dietary Counseling	59
	What Does the Evidence Show about the Benefits of Dietary Counseling?	60
	Further Reading	63
<b>8</b>	<b>Energy Balance, Nutrition, and Cancer Incidence and Survivorship</b>	65
	Cancer Survivorship	65
	Obesity, Related Comorbidities, and Cancer	66
	Energy Balance, Nutrition, Cancer Incidence, and Survivorship	67
	What is the Future of Research in this Area?	70
	References	71
<b>9</b>	<b>Psychosocial Aspects of Nutrition</b>	73
	What Types of Psychosocial Issues Related to Nutrition Do Cancer Patients Face?	74
	How Can Healthcare Professionals Help?	76
	Conclusions	79
	References	79
<b>10</b>	<b>Nutrition and Cancer: a Health Economics Approach</b>	81
	Introduction	81
	The Effect of Reducing Overweight on the Incidence of Breast Cancer	84
	Benefits of Lower Incidence: QALY Gain	85
	Benefits of Lower Incidence: Reduced Expenditure on Breast Cancer Care	86
	Benefits of Lower Incidence: Increased Labor Participation	87
	Cost-effectiveness Calculations	88
	Cost-benefit Calculations	89
	Conclusions	90
	Further Reading	90
